

## **As bristle prices soar Kirschner Brush expands top quality brush line**

As parts, materials and skilled labor have become costly and difficult to find, most brush manufacturers have discontinued their high end lines.

Kirschner Brush has a different strategy. ***“We are gearing up to expand”*** says Israel Kirschner, Manager of this family business. ***“I have seen this shift and have made an extra effort to seek out the materials. As bristle gets more and more expensive and skilled labor in the US becomes almost obsolete - we are still buying bristles and employing the finest brush makers.”*** Kirschner Brush, now the premiere supplier of high end industrial paint brushes such as Bridge Brushes, Leather Bound and Dutch Calcimine and is adding new brushes to their line.

With 40 years experience in supplying paintbrushes for applications where the brush quality makes a difference (both in the quality of the results and the ability to produce that quality in less time) Kirschner knows this market segment. With a skilled labor force and trademark commitment to customers in place, Kirschner Brush is expanding its manufacturing of boutique industrial brushes that are ideal for painting bridges, building exteriors, hard-to-reach areas, rough surfaces and general construction. Throughout the years Kirschner Bridge Brushes have been used on the George Washington Bridge, Outerbridge Crossing, Goethels Bridge and other bridges and roads throughout the country.

### **Leather Bound Oneida**

A unique leather-bound setting gives this brush an excellent grip and prevents excess dripping – **now available in a 'bridge-blend' of nylon and pure China bristle.**

### **Dutch Kalsomine**

Lacquered Dutch handles hold together with **extra-wide, extra-thick brush**, perfect for painting large areas quickly and easily.

### **Spade - Semi-oval Varnish**

This seamless brush combines the function of the Oneida with the ability to apply varnish, lacquer, enamel and shellac to smooth surface materials.

### **Manhelpers**

These size 20 oval varnish brushes have a **metal attachment to attach to a pole** to allow for reaching great heights and lengths.

At Kirschner Brush one can find these as well as a full line of industrial brushes and styles custom built for any painter or contractor's specific needs. Kirschner Brush has highly skilled workers making all of its brush products – paint brushes, varnish brushes, chip brushes and more. Each brush is customized and shampooed individually.
